PROFESSIONAL SUMMARY

Application IT Analyst with 3 years supporting mission-critical airport environments across Italy and the European Union. Specialised in application support, IT infrastructure, Microsoft 365 / Exchange, monitoring and PowerShell automation, keeping 24/7 operations running. Works across multiple client systems and ticketing platforms and collaborates directly with development teams to diagnose and resolve production issues. ITIL 4 Foundation certified; English C1.

CORE SKILLS

Application Support: Log & exception analysis, Java, Tomcat, Servlets, release testing, Oracle BI

Microsoft 365 & Exchange: transport rules, licensing, shared mailboxes, distribution lists, identity sync

Databases: SQL, Oracle, health checks, tablespaces, real-time troubleshooting

Infrastructure: Active Directory, DHCP, Group Policy, Windows Server, Linux, switches, Raspberry Pi

Monitoring & Automation: PRTG, custom alerts, PowerShell, Task Scheduler, SharePoint sync, REST APIs

Security & Service Desk: Darktrace, phishing triage, Exchange tracing, JIRA, OTRS, Ivanti, SLA management

PROFESSIONAL EXPERIENCE

Application IT Analyst

Aug 2024 – Present

[Software Design S.r.l.](#) — [Airport clients across Italy & the EU](#) · Naples, Italy

- Provide 2nd- and 3rd-line IT support to a portfolio of airport clients, each with its own systems, ticketing platforms and operational standards.
- Test and deploy Java, Tomcat and Servlet releases across Sandbox and Production, handling full application builds and deployments.
- Troubleshoot SQL, PRTG and application logs alongside development teams; run database health checks and build Oracle BI reports for accounting and operations.
- Administer Active Directory, DHCP, Group Policy and Microsoft 365 / Exchange (transport rules, licensing, shared mailboxes, distribution lists, identity sync).
- Automate repetitive work with PowerShell (bulk AD provisioning, certificate-secured SharePoint sync, API integrations) and triage security / phishing alerts with Darktrace.

Freelance Software Developer

2025

[Self-employed](#)

- Designed, built and published a commercial booking platform for a barbershop on the Google Play Store — appointments, calendars, customers and staff schedules — handling the database, UI, deployment, updates and client support end to end.

Help Desk — Level 1 Support

Aug 2023 – Aug 2024

[Software Design S.r.l.](#) — [Naples Airport](#) · Naples, Italy

- First point of contact for airport IT — workstations, applications and network connectivity under real-time operational pressure — with SLA-compliant incident and service-request handling via ticketing.
- Managed user access and accounts, and escalated complex incidents to 2nd-level and infrastructure teams with full documentation and troubleshooting steps.
